Lloyd's Register of Yachts

Subscribers are entitled to have full particulars of their yachts entered in the *Register*, irrespective of size; otherwise it is the practice to restrict the entries in general to sailing yachts of a sail area not less than 350 sq. ft. and to motor yachts of 27 ft. and over on the water-line.

The entry of the particulars of a yacht in the *Register of Yachts* does not constitute either classification or official registration. Classification is referred to on page ix and information respecting tonnage measurement and official registration is given on page xi.

Cuttings of the craft listed in the main section of the *Register* are sent to all Owners annually at the beginning of October, and should be returned promptly with any necessary comments. In the absence of any information from an Owner or other source over a considerable period, it is assumed that the standing entry is no longer reliable, and the particulars are removed from the *Register*.

The *Register* lists details of many Canadian yachts; but as regards United States craft generally only the larger yachts and those holding the Society's classification are included in this volume.

The Secretary wishes to thank Yacht Owners for their co-operation and hopes that this will be continued so that the *Yacht Register* may be as comprehensive and accurate as possible.

Lloyd's Register of Yachts

Lloyd's Register's Classification and Certification of Yachts and Condition Surveys

Classification

Just as the world-famous **100A1** classification symbol indicates that a modern passenger liner, or a giant supertanker, has been built to the exacting requirements of the Society's rules, so the same symbol is available to the individual yacht owner. Classification is open to all types of yachts provided the constructional details conform to the requirements laid down by Lloyd's Register of Shipping.

Yachts built in accordance with the Society's rules for wood, steel or glass reinforced plastic will be classed **100A1** or class **R**.

An owner desiring classification should, when ordering a new yacht, specify that the yacht be built to Lloyd's Register of Shipping class. The builder will then, through the designer, become responsible for submitting the necessary plans for the Society's approval, and will request a special survey during construction in accordance with the Society's requirements, so that the appropriate class may be assigned on completion.

Premises of moulders and builders of yachts must be inspected to ensure that management and facilities are capable and satisfactory to mould/build hulls to the standard required by the Society for classification or Lloyd's Register Building Certificate.

For maintenance of classification, periodical surveys and repairs are carried out under the supervision of Lloyd's Register of Shipping Surveyors; such a procedure helps to keep a yacht in a high state of efficiency and to preserve her sale value, in addition to the benefit of having a competent, independent and experienced organization to safeguard the owner's interest. A record of each periodical survey is made in the *Yacht Register*.

Lloyd's Register Building Certificate (LRBC)

As an alternative to classification, the Society will provide a Lloyd's Register Building Certificate to newly constructed yachts up to 20 metres (66 feet) in overall length which have been built of any approved material in accordance with the Society's Yacht Rules and Regulations, under the supervision of the Society's Surveyors, without the requirements of mandatory periodical surveys thereafter.

Plans of hull and materials data, and of machinery and electrical equipment, must be submitted for approval in the same way as for classification.

The standard GRP production yacht will be eligible to receive classification or a Lloyd's Register Building Certificate on satisfactory completion of all stages of construction and installation of machinery and electrical equipment as shown hereafter:

(a) **HMRN (Hull Moulding Release Note)**
A Release Note, showing basic items of construction from moulded hull to the completed yacht considered essential to the hull serviceability, will be issued to the Moulder/Builder to cover items inspected by the Society's Surveyors.
This NOTE is **not** a Certificate.

(b) **HCC (Hull Construction Certificate)**
When all outstanding applicable items shown on the HMRN are examined and found satisfactory by the Society's Surveyors, a Hull Construction Certificate will be issued to the Moulder/Builder.

(c) **MIC (Machinery Installation Certificate)**
When the machinery and electrical equipment have been installed under the supervision of the Society's Surveyors, a Machinery Installation Certificate will be issued to the Moulder/Builder.

Any yacht which holds an HCC and MIC is eligible to receive a LRBC (Lloyd's Register Building Certificate) and have the particulars entered in the next edition of the *Register of Yachts*. A Request form for a LRBC survey must be completed and forwarded before construction commences and, after receipt of HCC and MIC certificates, a LRBC may be applied for. The name of the yacht and the name and address of the owner should be supplied for insertion on the LRBC and entry in the *Register of Yachts*.

No mandatory periodical surveys will be required for LRBC yachts, but the Society offers an Advisory and Consultancy Service to owners and builders of such craft.

Condition Surveys

The Society will undertake Condition Surveys of yachts on behalf of purchasers or owners, provided the yachts were originally moulded or built under the supervision of the Society's Surveyors. In certain instances the Society reserves the right to decline such surveys.

Further information on **all** the services available to yachtsmen may be obtained from:
The Secretary,
Lloyd's Register of Shipping,
Yacht & Small Craft Department,
69 Oxford Street,
Southampton, SO1 1DL, England.
Telephone: Southampton (0703) 20353
Telex: 477261, Register Southampton.

Lloyd's Register of Shipping Surveyors specializing in surveys of yachts are stationed at Glasgow, London, Plymouth and Southampton. These Surveyors can undertake surveys by arrangement at other ports in the United Kingdom or Europe.

Lloyd's Register's Tonnage Measurement Service for Official Registration of British Yachts

Tonnage Measurement

Lloyd's Register of Shipping has been authorised by the Department of Trade to carry out tonnage measurement of pleasure yachts **under 45 feet (13.7 metres) overall length** in the United Kingdom and abroad, for the purpose of obtaining British Registration. The Certificates of Survey are also accepted by Bermuda, Gibraltar, Guernsey and Jersey.

The standard fee for tonnage measurement in the United Kingdom of a yacht in this category is £45.00 inclusive of expenses. Fees for surveys abroad are dependent on the accessibility of the yacht and the time spent for the work and travelling expenses incurred.

Requests for tonnage measurement, accompanied by the appropriate remittance, should be submitted on Application for Tonnage Measurement form SUR. 6A and addressed to:

The Secretary,
Lloyd's Register of Shipping,
Yacht & Small Craft Department,
69 Oxford Street,
Southampton, SO1 1DL.

For measurement of pleasure yachts **of 45 feet (13.7 metres) and above overall length,** application should be made to the Department of Trade.

Official Registration

To have a pleasure yacht registered under the British Flag, an Owner requires to carry out the following procedure:

Apply in writing to the Registrar of British Ships at the port at which the yacht is to be registered.

Produce to the Registrar documents of title which establish ownership—a Builder's Certificate or Bill of Sale.

Obtain approval of the pleasure yacht's name from the Registrar-General of Shipping & Seamen, Department of Trade, Llantrisant Road, Cardiff, CF5 2YS.

Arrange for tonnage measurement as referred to above.

Make a Declaration of Ownership.

Arrange for carving and marking for identification purposes to be done, and sign a Declaration to that effect when the work is completed.

Pay the registry fee to the Registrar at the port of registry. This fee is additional to the fee for tonnage measurement.

When these requirements have been met, the Registrar will register the pleasure yacht and issue a Certificate of Registry.

Key to Register

Abbreviation	Column No.	Explanation
•	3	†Master's Certificate
★	8	†Built under survey without classification

Ywl	2	Yawl

† For a more detailed explanation of the abbreviation please refer to the following section, 'Explanation of Contents' under the heading of the appropriate Column Number

Explanation of Contents

INCLUDED IN THE REGISTER OF YACHTS SECTION

COLUMN 1

LR Identity No.

The six-figured number printed in bold type, prefixed by the letter Y, will be used for automatic data processing and will remain unchanged during the life of the yacht.

Signal Letters

These are assigned by the National Authority with which the yacht is registered.

Official No.

The number in lighter figures is the official registered number of the yacht, assigned by the National Authority. In the case of British and Commonwealth yachts it is assigned by the Registrar-General of Shipping and Seamen, Llantrisant Road, Llandaff, Cardiff, CF5 2YS.

COLUMN 2

Former Names

Former names are retained in the *Register* throughout the life of the yacht. An Index to these names is given in the Former Names of Yachts section at the back of the *Register*.

Type

Bermudan Sloop, Bermudan Yawl, etc., are described simply as Sloop, Yawl, etc.

Material

The material of construction is only published when other than wood.

Sail Numbers

Racing Sail Numbers are as supplied by the owners.

COLUMN 3

Master's Certificate

An asterisk * before an Owner's name indicates that he has obtained a Certificate of competency as Master, as issued by the National Authority.

Column 3 (cont'd)

Port of Registry

In the case of an officially registered yacht the Port of Registry is given.

Home Port

The Home Port is where the permanent mooring of the yacht is located.

COLUMN 4

Net and Gross Tonnages

When yachts are officially registered, the official registered tonnage measured according to the law of the country to which the yacht belongs is published. When the tonnages are printed in italics, they are not those assigned by the country to which the yacht now belongs.
With effect from the 1st June, 1975, new regulations for the measurement for tonnage of British registered pleasure yachts under 45 feet in length overall, result in only one tonnage being computed. This tonnage, known as the registered tonnage, is recorded on the second line normally showing a gross tonnage.

Thames Measurement Tonnage

Thames Measurement Tonnage is an approximate representation of the internal capacity of a yacht derived from a system of measurement adopted by the Royal Thames Yacht Club in 1854 and amended in 1962. The formula for computing the Thames Measurement Tonnage is as follows:—

$$\frac{(L-B)\times B\times \frac{1}{2}B}{94} = \text{Thames Measurement Tons}$$

Where:

L = The length measured from the fore side of the stem at deck level to the aft side of the stern-post at deck level.
Where the stern-post does not extend to deck level, the measurement shall be taken to:

(a) the prolongation of the line of the aft side of the stern-post to deck level;
(b) if there is no stern-post, to the centre line of the rudder stock at deck level or the prolongation of that line to deck level;
(c) if there is no stern-post or fixed rudder stock, or if the rudder stock is wholly abaft the transom, the measurement shall be taken to the aft side of the transom at deck level.

B = Extreme breadth of hull, excluding protrusions such as rubbing strakes, beltings, chain-plates, vents, etc.

Measurements to be taken in feet and tenths of a foot.
The tonnage determined in accordance with the above formula shall be expressed to the nearest ton. Fractions of less than half a ton shall be ignored and fractions of half a ton and over shall be taken as one ton.

Column 4 (cont'd)

The rule shall not apply to yachts of more than one hull.
In the case of a British yacht officially registered but not classed with Lloyd's Register, the registered length is used in the *Yacht Register* in calculating the Thames Measurement Tonnage. Since the introduction, on the 1st June, 1975, of new British regulations for the registration of yachts under 45 feet overall length, the former registered length is no longer measured during the survey. Consequently, yachts registered under these new regulations will not have a Thames Measurement Tonnage calculated.

Lloyd's Register Tonnage

Lloyd's Register Tonnage (LT) is used for estimating hull survey fees of classed yachts and it is obtained from the formulæ:

$$\frac{L\,(OA)\times B\times D\times 0{\cdot}45}{100} = \text{LR Tonnage}$$

Where:

L (OA) = maximum length, in feet,
B = maximum breadth, in feet, excluding protrusions,
D = moulded depth, in feet,

or

$$\frac{L\,(OA)\times B\times D\times 15{\cdot}9}{100}$$ where length, breadth and depth are in metres

COLUMN 5

Dimensions

The dimensions which are printed on the top line are given in feet and tenths of a foot and are those employed for calculating Thames Measurement Tonnage. In the case of yachts classed by Lloyd's Register, these are obtained from the Society's Surveyor's First Entry Report of Survey; where yachts are not classed by the Society, but are officially registered, the dimensions are obtained from the vessel's Certificate of Registry. In other cases, the dimensions are as given on returns received from Owners, Builders, etc.

Thames Measurement Length — The length entered on the top line is the length measured from the fore side of the stem at deck level to the aft side of stern-post at deck level, except in the case of unclassed yachts which are officially registered as British vessels, when the registered length is recorded.

Overall length — This measurement is entered on the second line.

Water-line length — This measurement is entered on the third line.

Column 5 (cont'd)

Breadth The breadth recorded is the extreme breadth.

Depth The depth is taken from the top of floors to top of upper deck beams amidships.

Draft The draft is the maximum draft to bottom of keel.

Sail area The sail area recorded is the area of the working sails and is given in square feet.

COLUMN 6

Year of Build

The completion date is accepted as the year of build. In the case of yachts built under Lloyd's Register Special Survey, the year of build is recorded as follows:

Prior to 1903 Date of Launch.

From 1903–1924 The last date of survey for first entry of classification when completed within six months of launching; otherwise six months after date of launch.

After 1924 Date of completion of Special Survey during construction.

COLUMN 7

Internal Combustion Engines

When known, the brake horsepower of each engine is published. In some instances the diameter of cylinders and length of stroke is shown.

Oil Engine Indicates an internal combustion engine using heavy oil as fuel.

Petrol Motor Indicates an internal combustion engine using petrol or other highly volatile oil as fuel.

Paraffin Motor Indicates an internal combustion engine using paraffin oil as fuel although started up on petrol.

COLUMN 8

✠ This symbol denotes that the yacht was built under the Special Survey of the Surveyors in accordance with the Society's *Rules*, thus ✠**100A1**.

Column 8 (cont'd)

100A1 Yacht — This class is assigned to wood, composite, steel, aluminium, reinforced plastic and ferrocement yachts built in accordance with, or by standards equivalent to, the relevant requirements of the Society's *Rules for the Construction and Classification of Yachts*.

100A1 Catamaran or Trimaran — These classes are assigned to catamarans or trimarans built in accordance with the Society's *Rules* and having scantlings and arrangements as approved for such yachts. It is a condition for the assignment of these classes that the carrying capacity is approved and that this loading is not exceeded in service. The loading is entered on the classification certificate.

1 — The figure **1** after the class character denotes that the yacht is well and efficiently equipped in accordance with the Society's *Rules for the Construction and Classification of Yachts* (*see* Equipment Tables).

— — A line thus — after the class character denotes that the full requirements of the Society's *Rules for the Construction and Classification of Yachts* in respect of equipment have not been complied with, but the equipment fitted is sufficient for the efficient working of the yacht.
In the case of yachts classed **R**, the equipment is required to be in accordance with the *International Yacht Racing Union Rules* and the figure **1** for equipment therefore does not apply.

International Rating Class Rules

In the case of yachts designed and intended for racing under the *International Rating Class Rules*, the following characters of classification and notations are assigned:

R — with a term of years. This class is assigned to wood yachts designed and intended for racing under the rules of the *International Yacht Racing Union* for the International Rating Classes and built in accordance with the *Rules for the Construction and Classification of Yachts of the International Rating Classes*, and the Society's requirements for this class. All yachts thus designed and built are entered in the *Register of Yachts* with a notation in column 2 reading "Built to International Rating Class .... metres". The figures prefixed to the character thus, **16R, 14R,** indicate the term of years for which the yacht is initially classed.

R* — with a term of years. This class is assigned to wood yachts built to the class **R** but which no longer hold a valid rating certificate because of alterations, and whose scantlings and arrangements are not such that the class **100A1** may be assigned.

Column 8 (cont'd)

Mat — Materials, prefixed by the lower and higher terms of years assigned. These material gradings are regulated by the standard of the timber and fastenings used in the construction of the hull of an **R** class yacht when originally built, or at date of classification.

LRBC — LLOYD'S REGISTER BUILDING CERTIFICATE

This notation (with date of build) indicates that a yacht up to 20 metres (66 feet) in overall length has been built in accordance with the Society's Yacht Rules and the machinery and electrical equipment has been installed under the supervision of the Society's Surveyors, but for which classification was not desired and no mandatory periodical surveys are required thereafter.

★ — This sign indicates that the construction of the yacht has been supervised by a Surveyor to Lloyd's Register of Shipping, that satisfactory trials have been held and that the materials and workmanship have been found satisfactory. It does not mean that the yacht has been built to the requirements of the Society's *Rules for the Construction and Classification of Yachts*. This construction procedure has been discontinued.

✠LMC — LLOYD'S MACHINERY CERTIFICATE

This class is assigned to machinery built under the Special Survey of the Society's Surveyors at the maker's works and satisfactorily installed in accordance with the Society's *Rules for the Construction and Classification of Yachts*.

★LMC — LLOYD'S MACHINERY CERTIFICATE

This class is assigned to machinery which is of standard mass production and is not surveyed at the maker's works but is satisfactorily installed in accordance with the Society's *Rules for the Construction and Classification of Yachts*.

LMC — LLOYD'S MACHINERY CERTIFICATE

This class without the distinguishing marks ✠ or ★ is assigned to machinery of yachts submitted for classification, which although not built nor installed under supervision, is found or placed in accordance with the Society's Rule requirements for machinery at a Special Survey for classification.

Classification of the hull is dependent on the machinery being classed in accordance with the requirements of the Society's *Rules for the Construction and Classification of Yachts*, with the exception of sailing yachts fitted with engines not exceeding 50 BHP. In the case of auxiliary sailing yachts having two engines, machinery classification is not compulsory where each engine is under 50 BHP, although the total may be over 50 BHP.

Column 8 (cont'd)

Where yachts have been classed without classification of the machinery being required under Rules which have now been superseded, the notations (not classed) and (no longer classed) will remain in the *Register of Yachts*. The notation (no longer classed) denotes that classification previously assigned to machinery has been withdrawn.

UMS — Unattended Machinery Spaces. The yacht can be operated with the machinery spaces unattended and the control engineering equipment has been arranged, installed and tested in accordance with the Society's *Rules*.

NE — New Engine, with date of build, indicates the new engine(s) has been accepted for class. If preceded by the sign ✠ it denotes that the engine(s) has been built under Special Survey of the Society's Surveyors. If preceded by ★ this denotes the engine(s) is of standard mass production. It has not been surveyed at the maker's works but has been satisfactorily installed in accordance with the Society's *Rules for the Construction and Classification of Yachts*.

WITHDRAWAL OF CLASSIFICATION

LR class withdrawn—Owner's request

This indicates that when an Owner requested withdrawal of class from the *Yacht Register Book*, the rule requirements had up to that time been complied with. After one year in the *Register* the notation will be altered to "Classed LR until" (with date).

LR class withdrawn

This indicates that at the time of withdrawal of class from the *Yacht Register Book*, survey requirements had not been complied with. After one year in the *Register* the notation will be altered to "Classed LR until" (with date).

LR class withdrawn—reported defects

This indicates that owing to reported defects, the yacht was not entitled to retain her class in the *Yacht Register Book*. After one year in the *Register* the notation will be altered to "Classed LR until" (with date).

Column 8 (cont'd)

Surveys

(The period of surveys due are as prescribed in the Society's *Rules for the Construction and Classification of Yachts*)

AS	Annual or occasional Survey for yachts of the International Rating Classes.
BiS	Biennial Survey, alternating with Special Survey.
ContS	Continuation of class with date of survey, also number of years for which class is continued. Applies only to yachts of the International Rating Classes.
GE	General Examination of the yacht with a view to postponement of the Special Survey.
HT	Half Time Survey for yachts of the International Rating Classes.
Mchy. Exd.	Unclassed machinery and electrical installations examined at Hull Special Survey. The machinery examination only applies to existing classed auxiliary sailing yachts with unclassed machinery, where the brake horsepower of each engine is between 50 and 200, and all full power yachts up to 200 BHP.
ModSS	Followed by a term of years denotes that a Modified Special Survey has been held to maintain class for the limited period stated.
NDB	New Domestic Boiler, with date of build. If preceded by ✠ this signifies that the boiler was built under survey of the Society's Surveyors.
RestS	Restoration Survey, with date and number of years for which the character **R** is restored. Applies only to yachts of the International Rating Classes.
SS & SS(B)	Hull Special Survey. SS(B) applies to wood yachts only.
TD	Special Survey at which the rule requirements for determining the thickness of a steel yacht's structure by drilling, or other means, have been complied with.
TS	Tailshaft Survey, non-continuous liner.
TS(B)	Tailshaft Survey of shaft in bronze, stainless steel, or other similar approved material.
TS(CL)	Tailshaft Survey of shaft fitted with continuous liner.
TS(OG)	Tailshaft Survey of shaft fitted with approved oil retaining glands at aft end of sternbush.

Extract from the Society's Regulations

"In providing services information or advice neither the Society nor any of its servants or agents warrants the accuracy of any information or advice supplied. Except as set out herein neither the Society nor any of its servants or agents (on behalf of each of whom the Society has agreed this clause) shall be liable for any loss damage or expense whatever sustained by any person due to any act or omission or error of whatsoever nature and howsoever caused of the Society its servants or agents or due to any inaccuracy of whatsoever nature and howsoever caused in any information or advice given in any way whatsoever by or on behalf of the Society, even if held to amount to a breach of warranty. Nevertheless, if any person uses the Society's services or relies on any information or advice given by or on behalf of the Society and suffers loss damage or expense thereby which is proved to have been due to any negligent act omission or error of the Society its servants or agents or any negligent inaccuracy in information or advice given by or on behalf of the Society then the Society will pay compensation to such person for his proved loss up to but not exceeding the amount of the fee (if any) charged by the Society for that particular service information or advice, or that part thereof which caused the loss."
